Teens Representing Environmental Excellence & Stewardship (TREES)

As teens who are native to Lowell we didn't really experience many outdoor activities until we joined Environmental Adventures, an after-school program for freshmen at Lowell High School. As a group, we desired to expand the ideas we executed in Environmental Adventures. We started TREES in late 2014. We wanted to build a program that revolves around the natural environment of Lowell by enriching students and communities with the knowledge about the nature around them in their city.
